GLOBAL EMERGING MARKETS

- EM countries hold over 75% of the world's land, 86% of its population, and drive 80% of global GDP growth, yet represent only 11.4% of market cap—signaling potential for growth-focused investors.^{1,2,3}
- Offer outsized growth potential at discounted valuations compared to developed markets
- Provide a strong hedge for US dollar weakness
- Can provide portfolio diversification and potentially improve risk adjusted returns. Diversification does not ensure a profit or guarantee against a loss.

Investing involves risk, including the possible loss of principal. International investments may involve risk of capital loss from unfavorable fluctuation in currency values, from differences in generally accepted accounting principles or from economic or political instability in other nations. Emerging markets involve heightened risks related to the same factors as well as increased volatility and lower trading volume. Narrowly focused investments and investments focusing on a single country may be subject to higher volatility.

Shares of ETFs are bought and sold at market price (not NAV) and are not individually redeemed from the funds. Brokerage commissions will reduce returns.

Carefully consider the funds' investment objectives, risk factors, charges, and expenses before investing. This and additional information can be found in the funds' summary or full prospectus, available at globalxetfs.com. Please read the prospectus carefully before investing.
